

# Stay connected to your fleet:

## Advanced vehicle tracking and telematics solutions

### Elevate your fleet management with real-time visibility and insights

#### Geofencing for enhanced control

- ✔ Create virtual boundaries with alerts to know in real-time when vehicles enter or leave designated areas to correct unauthorized use or recover misplaced vehicles

#### Optimize fleet utilization

- ✔ Identify vehicle usage by monitoring idle, stop and transit times to improve driver efficiency and reduce fuel and operational costs

#### Trip history and proof of service

- ✔ Review journeys to verify deliveries, incidents and driver durations at specific locations

#### Monitor driving behavior

- ✔ Receive alerts for critical events such as hard braking, speeding and excessive idling, enabling prompt action to address unsafe driving behaviors and improve overall fleet safety

#### Maintenance

- ✔ Maintain fleet compliance with electronic vehicle checks and remotely downloaded reports that identify warning signs, ensuring each asset stays at peak performance
